## Seamless connectivity. Total confidence.

### **Productive**

Trimble<sup>®</sup> Inertial Platform<sup>™</sup> (TIP<sup>™</sup>) technology. Calibration-free IMU-based tilt compensation for topo measurements and stakeout.

Trimble ProPoint<sup>®</sup> GNSS positioning engine. Engineered for improved accuracy and productivity in challenging GNSS conditions.

Trimble CenterPoint<sup>®</sup> RTX corrections for RTK level accuracy worldwide via satellite or internet.

## Connected

Integrated 450 MHz or dual-band 450/900 MHz UHF transceiver.

Integrated worldwide 4G LTE modem.

& Trimble

Internet base station and remote receiver control capabilities.

Bluetooth<sup>®</sup> and Wi-Fi<sup>®</sup> data connectivity.

### Trusted

Trimble TIP integrity monitoring.

Compensation

0

0

C

0

Trimble xFill<sup>®</sup> correction outage technology.

Trimble IonoGuard<sup>™</sup> technology for mitigation of ionospheric GNSS signal disruptions.

Military-spec rugged design and IP-67 rating.

Lithium ion battery with built-in status indicator.

	SBAS <sup>10</sup>	Typically < 5 m 3DRMS		
HARDWARE				
PHYSICAL				
Dimensions (W×H)	11.9 cm x 13.6 cm (4.6 in x 5.4 in)			
Weight	1.13 kg (2.49 lb) with internal battery, integrated radio and UHF 3.96 kg (8.73 lb) items above plus range pole, Trimble TSC7 data	antenna a collector and bracket		
Temperature <sup>11</sup>				
	Operating	-40 °C to +65 °C (-40 °F to +149 °F)		
	Storage	-40 °C to +80 °C (-40 °F to +176 °F)		
Humidity	100%, condensing			
Ingress protection	IP67 for temporary submersion to depth of 1 m (3.3 ft), dustpro	pof		
Shock and vibration				
	Pole drop	Designed to survive a 2 m (6.6 ft) pole drop onto a hard surface		
	Shock - Non-operating	To 75 g, 6 ms		
	Shock - Operating	To 40 g, 10 ms, saw-tooth		
	Vibration	MIL-STD-810H, Fig 514.8C-6		
ELECTRICAL				
External	11 to 24 V DC external power input with over-voltage protection	n on Port 1 and Port 2 (7-pin Lemo)		
Battery	Rechargeable, removable 7.4 V, 3.7 Ah Lithium-ion smart batter	with LED status indicators		
Danna an ann an tian	4.2–4.6 W in rover mode with internal 450 MHz receive radio	5.4–6.6 W in base mode with internal 450 MHz transmit radio		
Power consumption	4.0 W in rover mode with internal 900 MHz receive radio	4.3 W in base mode with internal 900 MHz transmit radio		
	3.7 W in rover mode with internal LTE modem	3.7 W in base mode with internal LTE modem		
Operating times on inter				
Rover	450 or 900 MHz receive	5.5–6.3 hours		
	Cellular receive (Internal or Controller via Bluetooth)	7.0 hours		
	450 MHz transmit (0.5 W)	4.7 hours		
Base station	450 MHz transmit (1.0 W)	3.7–4.1 hours (1.0 W transmit available only where legally permitted)		
	900 MHz transmit (1.0 W)	6.0 hours (900 MHz transmit available only where legally permitted)		
	Cellular transmit	7.0 hours		
COMMUNICATION	IS AND DATA STORAGE			
	Fully-integrated, sealed 450 MHz wide band transceiver with from (RED 2014/53/EU compliant) or dual-band 450/900 MHz transce			
Radio modem	Support for Trimble, Pacific Crest, and SATEL radio protocols			
	Transmit power	0.5 W, 1.0 W (1.0 W available only where legally permitted)		
	Range	3-5 km typical, 10 km optimal <sup>14</sup>		
		FDD-LTE: bands 1, 2, 3, 4, 5, 7, 8, 12, 13, 18, 19, 20, 26, 28, 66		
	Fully integrated, fully-sealed LTE compliant module with	TD-LTE: bands 38, 40		
Cellular <sup>15</sup>	2G/3G fallback	UMTS (WCDMA/FDD): bands 1, 2, 3, 4, 5, 6, 8, 19		
		Quad band GSM: 850, 900, 1800, 1900 MHz		
Bluetooth	Fully-integrated, fully-sealed 2.4 GHz Bluetooth module	Bluetooth EDR/BR v5.1		
Wi-Fi	Fully-integrated, fully-sealed 2.4 GHz Wi-Fi module	Simultaneous Access Point (AP) and Client modes		
Positioning rates	1 Hz, 2 Hz, 5 Hz, 10 Hz, and 20 Hz	Sindle recession on the and and chent modes		
I/O ports				
	Serial, USB, TCP/IP, IBSS/NTRIP, Bluetooth			
Data storage Correction fomats	9 GB internal memory	orted for 800 MHz LIHE)		
	CMRx, CMR+, CMR, RTCM 2.x, RTCM 3.x (RTCM output not supported for 900 MHz UHF)			
Data outputs	NMEA 0183, GSOF, RT17 and RT27 7-pin 0S Lemo, 3-wire RS-232			
Serial	•	ions		
USB	USB v2.0, supports data download and high speed communication	tions

TRIMBLE PROTECTE	D PROTECTION PLANS	
	Add a Trimble Protected protection plan for worry-free ownership over and above the standard Trimble product warranty.	

Added enhancements include coverage for wear & tear, environmental damage, and more. Accidental damage is covered with Premium plans, available only at point-of-sale in selected regions.

For details, visit trimbleprotected.com or contact a local Trimble distributor.

- Challenging GNSS environments are locations where the receiver has sufficient satellite availability to achieve minimum accuracy requirements, but where the signal may be partly obstructed by and/or reflected off of trees, buildings, and other objects. Actual results may vary based on user's geographic location and atmospheric activity, scintillation levels, GNSS constellation health and availability, and level of multipath and signal occlusion.
- The current capability in the receivers is based on publicly available information. As such, Trimble cannot 2 guarantee that these receivers will be fully compatible with a future generation of Galileo or signals.
- Precision and reliability may be subject to anomalies due to multipath, obstructions, satellite geometry, 3 and atmospheric conditions. The specifications stated recommend the use of stable mounts in an open sky view, EMI and multipath clean environment, optimal GNSS constellation configurations, along with the use of survey practices that are generally accepted for performing the highest-order surveys for the applicable application including occupation times appropriate for baseline length. Baselines longer than all of the appreciate appreciation including occupation runs appropriate for baseline rengen ba
- 5
- Network RTK PPM values are referenced to the closest physical base station. May be affected by atmospheric conditions, signal multipath, obstructions and satellite geometry. Initialization reliability is continuously monitored to ensure highest quality. TIP references the overall positioning error estimate at the tip of the surveying pole throughout the tilt compensation range. RTK refers to the estimated horizontal precision of the underlying GNSS position, which is dependent on factors that affect GNSS solution quality. The 5 mm constant error component accounts for residual misalignment between the vertical axes of the receiver and the built-in Inertial Measurement Unit (IMU) after factory calibration, assuming the receiver is mounted on a standard 2 m carbon fiber range pole which is properly calibrated and free from physical defects. The tilt-dependent error component is a function of the quality of the computed tilt azimuth, which is assumed here to be aligned using optimal GNSS conditions. RMS performance based on repeatable in field measurements. Achievable accuracy and initialization
- time may vary based on type and capability of receiver and antenna, terms geographic location and atmospheric activity, scintillation levels, GNSS constellation health and availability and level of multipath including obstructions such as large trees and buildings. Accuracies are dependent on GNSS satellite availability. xFill positioning ends after 5 minutes of radio
- downtime. xFill is not available in all regions, check with your local sales representative for more information. RTK refers to the last reported precision before the correction source was lost and xFill started.
- 10 Depends on SBAS system performance.
- Receiver will operate normally to -40 °C, internal batteries are rated from -20 °C to +60 °C (ambient +50 °C). 11

- 12 Varies with temperature and wireless data rate. When using a receiver and internal radio in the transmit mode, it is recommended that an external 6 Ah or higher battery is used.

- 3 900 MHz range only available in select regions.
   4 Varies with terrain and operating conditions.
   5 Due to local regulations, the integrated cellular modem cannot be enabled in China, Taiwan, or Brazil. A Trimble controller integrated cellular modem or external cellular modem can be used to obtain GNSS corrections via an IP (Internet Protocol) connection.

Specifications subject to change without notice

- Made for
- iPhone 13
  iPhone 13 Pro
  iPhone 13 Pro Max

- iPad (9th generation)
  iPad Pro 12.9-in. (5th generation)
  iPad Pro 11-in. (3rd generation)

Use of the Made for Apple badge means that an accessory has been designed to connect specifically to the Apple product(s) identified in the badge and has been certified by the developer to meet Apple performance standards. Apple is not responsible for the operation of this device or its compliance with safety and regulatory standards.
